

Changes Installed:

The table below is a listing of the Help Desk Tickets (HDT) resolved in PBUSE Version SCP06.1-OOC2.

04/27/07 Changes Installed in SCP06.1-OOC2

HDT	Category	Summary	Description	Resolution	Dups
HD30572	PBUSE	ECP-S: Add PBUSE Training Job Aids	CASCOM has funded an effort to provide additional PBUSE Training Job Aids to be placed on the PBUSE server with links within the PBUSE GUI(s).	A link to Job Aids Training has been placed on the PBUSE Main Menu on the left side of the screen beneath the EUM. Job Aids will provide functional area refresher training.	
HD33617	PBUSE	Unable to access Job Aids site	Unable to access Job Aids site	The Job Aids development community republished the release using Flash Player 7 and changed the file names to comply with the Unix naming conventions.	
HD35474	PBUSE	Cluster Crash during DB backups and PBUSE operations	PBUSE enterprise cluster crashes during database backups and regular operations. Shared SAN storage reported as unavailable, cluster nodes crash. Notes: Vender recommended enabling verbose debug for fiber transport drivers	The fiber transport driver "throttle" parameters were set to avoid flooding the transport paths. * SSD Driver Settings set ssd:ssd_error_level=0 set ssd:ssd_max_throttle=64	
HD35807	PBUSE	Downgrade Firewall Firmware	Oracle standby database file corruption is possibly caused by and upgrade to Sonic Wall Firewall Firmware.	The Firewall Firmware was rolled back to a previous version.
